

For Residential and Light Commercial Systems, the Controller that Sets the Standards for Economy and Versatility

Introducing a controller with the kind of features virtually no other competitively priced controller has. The Hunter SRC brings to the economy end of the scale the kind of sophisticated technology and built-in convenience that was once only available on top-of-the-line products. Imagine...dial programming and a large display for quick set-up...a built-in 365-day calendar clock to accommodate odd/even watering restrictions

(no monthly reprogramming hassles)...a convenient rain sensor bypass circuit...a full three programs, each with four start times. It's all here in this solidly built command center featuring a rugged cabinet that gives the product a polished, professional look. Why pay more to get all of the features you can get right here for a whole lot less? The Hunter SRC is the controller that's setting new standards for economy and versatility.

FEATURES & BENEFITS

Dial programming

Easy program entry for installers and end-users

3 programs with multiple start times

Accommodates repeat watering requirements, morning, afternoon and evening

Large LCD display

At-a-glance viewing

365-day calendar clock

Accommodates odd/even watering restrictions, maximum flexibility

Rain sensor bypass

Quick override of rain sensor, no separate switch required

Wiring compartment with terminal strip

Fast installation, extra space to work

Non-volatile memory

Holds programs indefinitely, excellent insurance against unreliable power

As easy to install as it is to use

Sure, we made the SRC controller easy to use. But we made one thing even easier than that – installing it! We provide you with an exceptionally large wiring compartment and a handy provision for conduit, as well as a wall mounting bracket. There's no measuring, no pilot holes, no special templates necessary. All you need to do is position the bracket, install two screws (provided) and hang the controller. Once again, easy does it.

Make your simple and reliable controller even simpler

Now you can make your user-friendly SRC controller even easier to operate with the optional SRR remote control. Imagine the convenience of being able to manually activate any zone from anywhere in a yard — up to 450 feet from the controller. For more information on this handy new option, consult Hunter SRR brochure # LIT-225.

Electrical Specifications

- Transformer input: 120VAC, 60 Hz (plug-in indoor transformer)
- Transformer output: 24VAC, 0.75A
- Station output: 24VAC, 0.3A per station
- Maximum total output: 24VAC, 0.6A, includes master valve circuit
- Battery backup: 9-volt alkaline battery in separate compartment (not included)
- Master valve output: 24VAC, 0.3A
- Overload fuse: 0.75A spare fuse provided
- Surge protection: primary MOV-type
- Rain sensor override compatible with all major brands
- Preset test cycle program "C"
- Central control compatible with Hunter Irrigation Management and Monitoring System™
- Compatible with Hunter's SRR & ICR Remote Control Systems
- UL listed

Models

SRC-600i – 6-station, indoor model

SRC-900i – 9-station, indoor model

Dimensions

- Overall height: 8¼"
- Width: 8½"
- Depth: 2¼"

Operating Specifications

- Station run time: 0-99 minutes in 1-minute increments
- Start times: 4 per day, per program, for up to 12 daily starts
- Day schedule: 7-day calendar or true odd-even programming with 365-day calendar clock
- AM/PM or 24 hour clock option
- Start time stacking
- One button manual start and advance

SPECIFICATION GUIDE
